Senior Full Stack Developer with 5+ years building production applications across MERN/PERN stacks. Experienced in React, React Native, and Node.js, with hands-on exposure to AI integrations including RAG systems and voice agents. Proven track record leading development cycles and shipping end-to-end features.

PROFESSIONAL EXPERIENCE

GENUS TECH **Remote, USA**
Senior Software Engineer & Tech Lead *May 2022–Present*

- Architected an AI-driven RAG proposal generation system using go/no-go matrices, reducing proposal drafting time from hours to minutes
- Built real-time AI voice agents using LiveKit and managed platforms, enabling voice interaction workflows for doctors and real estate's firms integrated with custom software
- Designed and delivered end-to-end MERN/PERN web applications, owning architecture decisions from database schema to deployment
- Shipped a cross-platform React Native mobile app with Expo, integrated with custom AI backend services
- Participated in client meetings to gather requirements, scope features, and translate business needs into technical deliverables
- Led a team of engineers, conducted sync-ups, owned code review standards, and mentored junior developers
- Containerized production systems with Docker and deployed across AWS, GCP, Heroku, and VPS/Nginx environments
- Integrated third-party APIs across CRM, communication, and finance platforms such as stripe, Twilio and HubSpot etc

REMOTO CO **Remote, Spain**
Senior Full Stack Developer *Apr 2024–Mar 2025*

- Built a job board with an AI driven matching and recommendation system, using scheduled pipelines to fetch daily job data.
- Collaborated closely with the product team to define and refine key features and communicated technical updates effectively to non-technical stakeholders.
- Worked with Google BigQuery and Node.js to implement automated data transfer pipelines and debug complex data integration issues.

NINJAS CODE **Islamabad, Pakistan**
Junior Full Stack Developer *Jan 2022–May 2022*

- Revamped a multivendor food delivery platform (web + React Native mobile), improving performance and user engagement
- Maintained and extended MERN + GraphQL codebase across production systems

INSTASOFT SOLUTIONS **Islamabad, Pakistan**
Software Engineer Intern *Sep 2021–Dec 2021*

- Built dynamic PHP/MySQL web applications with responsive UIs and functional user experiences
- Contributed to Java-based modules, supporting implementation of core application features

EDUCATION

COMSATS University Islamabad **Islamabad, Pakistan**
BS Computer Science (GPA: 3.27/4.0) *Feb 2022*

TECHNICAL SKILLS

AI & Automation: RAG Systems, Vector Databases, LLM Integration, Prompt Engineering, AI Voice Agents (LiveKit), n8n Automation

Frontend: React, Next.js, React Native (Expo), JavaScript (ES6+), TypeScript

Backend: Node.js, Express.js, Nest.js, Python, PHP

Databases: PostgreSQL, MongoDB, Vector DBs, Database Modelling & Optimization

Cloud & DevOps: AWS, GCP,, Nginx, CI/CD, Heroku

Leadership: Team Leadership, Code Reviews, Agile/Scrum, System Architecture, Technical
